

AMAHORO SECONDARY SCHOOL

ACTIVITY OF INTEGRATION TERM ONE 2024

S.3 BIOLOGY

TIME 1:20MINUTES

INSTRUCTIONS.

This paper consists of only one question, attempt it.

All the time people interact with various materials in their homes. These materials are used for different purposes. It has been found that many people have a limited understanding of the chemical nature of the materials that they use. And yet in order to benefit more from these materials, the people need to understand their chemical nature and properties. This situation is the same in the community around.

As a senior three student, you have been selected by the district leaders to give a presentation to the community members near your school to help them understand more about the materials they use in their day to day lives and enable them to put the materials to proper use for maximum benefit.

Prepare a presentation to enable you explain to the community members the chemical nature of various materials so that they can benefit more from them.
