

ACTIVITY OF INTEGRATION ON ROCKS

KAREGEYA is a known place in Ntungamo known for having beautiful rocks that create a beautiful scenery that has attracted many tourists to that place. However people in the neighborhood believe that the rocks are formed by bachwezi, therefore there's no much that can be done on those rocks, because of this belief, the locals and government might be missing a lot on this natural resource

There's an ongoing campaign in the country on how best the country can benefit her natural resource. You have been invited by the radio Ankole to talk about this important natural resource.

TASK

Write a speech you would deliver on the talk show
