

HOPE COMMUNITY HIGH SCHOOL - WAIRAKA
UGANDA CERTIFICATE OF LOWER SECONDARY EDUCATION
S.3 GEOGRAPHY Assessment (2024)
1 hour 30 minute

INSTRUCTION

Attempt **ALL** questions.

1. 90% of the house hold in Uganda deriver their energy from firewood and charcoal. According to the world bank, the total demand for wood fuel is estimated to have increased by 9.1% between 2015 and 2019. This has translated into massive acres of forest and woodlands being cleared for firewood and charcoal leading to climate change. (source: the new vision newspaper: February 19th/2023) the above trend has continued and if no effort is made to change the situation, our grandchildren will not have a safe place to live in.

Support material

Task:

You have appointed as a national programme officer for NEMA, as a student of a geography, write an article of about 100 words on the recommendations/advice you will make to the ministry of environment to change the trend of forest cover destruction.

2. Ambrose is visiting lukaya for the first time. He is going to Lake Victoria using public transport and entering lukaya area from the south via Nabogavu swamp using all weather bound surface road.

Support material

- a. How much distance will Ambrose travel in kilometers along that road to reach a footpath that connect to a canoe landing at Kamuwunga on Lake Victoria
- b. He intends to tour lake albert, but has very little knowledge about how large the lake is. Help Ambrose to determine the area covered by the lake excluding the swamp.
- c. He intends to attend a church service at the Kankobe grig reference 877937 before visiting a school at grid reference 733915 near Namusujja. Help him determine the direction in which he will move from the church to the school and state the bearing of the school from the church

HOPE COMMUNITY HIGH SCHOOL - WAIRAKA
UGANDA CERTIFICATE OF LOWER SECONDARY EDUCATION
S.4 GEOGRAPHY ASSESSMENT (2024)
1hour 30minute

INSTRUCTION

Attempt ALL questions.

The expedition challenge

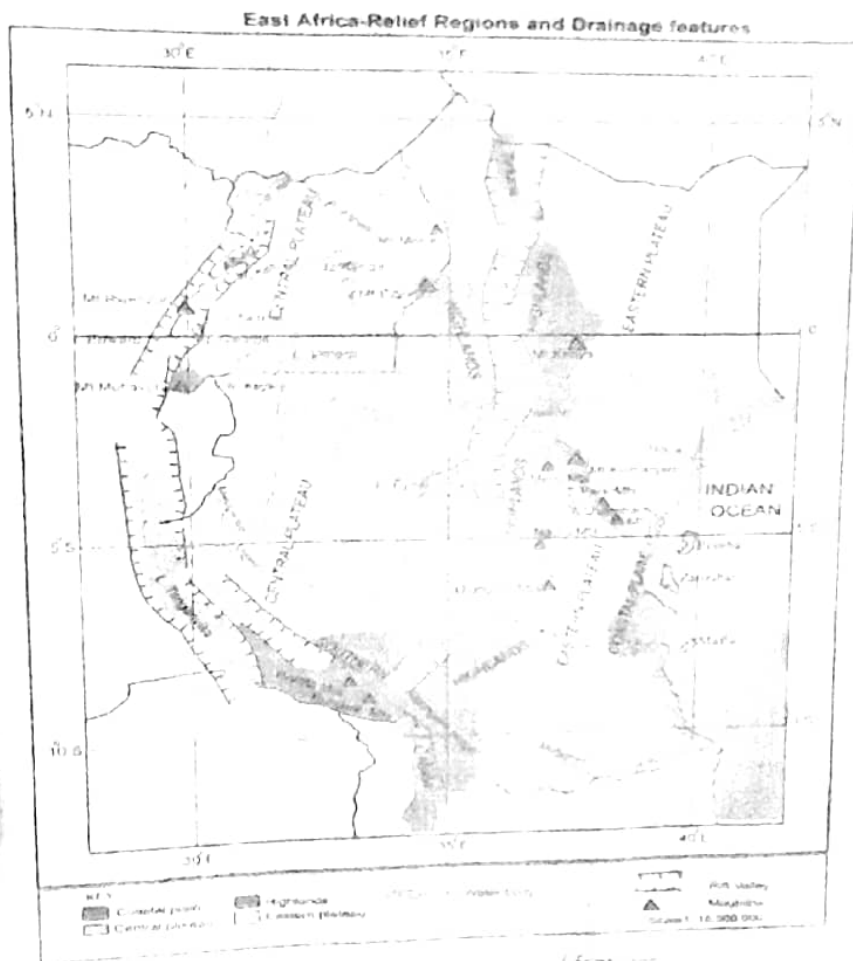

1. You are a member of an adventurous team of Hope Community High School. The school and geography department together with the wildlife club are embarking on executing expedition to Lukaya. Your team has been provided with a topographic map of the area and is now based at Lukaya sub county headquarters. Your mission as geographers on the team is to interpret the relief features, drainage and various land uses of this territory and plan a 2-day expedition that will have your team visit the most interesting places.

Support material

Task: Map out the area including its relief, drainage and land use and design a route that your team should take to visit the most interesting places. Justify why you have decided to use that route.

2. Africa is a continent of varied resources. These impact on people's ways of lives. An international environment organization wishes to invest heavily in the tourism and water resources. This organization has worked with the minister in charge of regional development and investment in the east African parliament. The organization has advertised a job entitled "regional landforms and water expert"

Support material

TASK: you have been shortlisted as a possible candidate to prepare a written plan aimed at attracting investors in the region, as a geography student 2024, prepare a presentation of about 500 words to enable you get a job.
